BOGDAN KUTASEVICH

FULL STACK DEVELOPER

SUMMARY

Full stack developer with a zeal to create, improve and develop the world around using technologies such as JavaScript, Typescript, React, HTML, CSS, Node JS. Have more than 4000 hours of coding and a couple of working projects on github. Previously being an engineer in the energy company, in addition to my engineer's responsibilities, i developed and implemented an interface for training dispatchers action in emergency situation to control high voltage line using web technologies. Have a lot of experience in logic and non-standard tasks such as implementing telegram bot or trading cryptocurrencies bot , work with software terminal equipment. Always open to learn something new. Now, I`m looking for new professional opportunities where my passion can be useful.
